```
user@deb:~/Documents/exam$ minikube start --cni=calico minikube addons enable ingress
🐳 minikube v1.37.0 on Debian 13.1 (vbox/amd64)
🔧 Automatically selected the docker driver
🔑 Using Docker driver with root privileges
🏠 Starting "minikube" primary control-plane node in "minikube" cluster
📡 Pulling base image v0.0.48 ...
🔥 Creating docker container (CPUs=2, Memory=3072MB) ...
🔧 Preparing Kubernetes v1.34.0 on Docker 28.4.0 ...
🔧 Configuring Calico (Container Networking Interface) ...
🔍 Verifying Kubernetes components...
   ▪ Using image gcr.io/k8s-minikube/storage-provisioner:v5
🌟 Enabled addons: storage-provisioner, default-storageclass

! /usr/bin/kubectl is version 1.32.3, which may have incompatibilities with Kubernetes 1.34.0.
   ▪ Want kubectl v1.34.0? Try 'minikube kubectl -- get pods -A'
🏠 Done! kubectl is now configured to use "minikube" cluster and "default" namespace by default
```

```
user@deb:~/Documents/exam$ ls
infra  infra.zip
user@deb:~/Documents/exam$ cd infra/
user@deb:~/Documents/exam/infra$ minikube kubectl -- apply -f infra/

user@deb:~/Documents/exam/infra$ minikube ip
192.168.49.2

```

```

user@deb:~/Documents/exam/infra$ minikube service ticket-ui

```

NAMESPACE	NAME	TARGET PORT	URL
default	ticket-ui		No node port

🐱 service default/ticket-ui has no node port
 ! Services [default/ticket-ui] have type "ClusterIP" not meant to be exposed, however for local development minikube allows you to access this !

```

user@deb:~/Documents/exam/infra$ kubectl patch svc ticket-ui -p '{"spec": {"type": "NodePort"}}'

```

service/ticket-ui patched

```

user@deb:~/Documents/exam/infra$ kubectl get svc ticket-ui
NAME      TYPE        CLUSTER-IP   EXTERNAL-IP   PORT(S)          AGE
ticket-ui NodePort    10.97.195.131 <none>        80:30928/TCP    16m

```

```

user@deb:~/Documents/exam/infra$ minikube service ticket-ui --url

```

NAMESPACE	NAME	TARGET PORT	URL
default	ticket-ui	http/80	http://192.168.49.2:30928

🌐 Opening service default/ticket-ui in default browser...

Aucun port HTTP n'était accessible (car aucun port exposé, ticket-ui est en ClusterIP), donc passage de ticket-ui en NodePort.

On se connecte avec les identifiants fournis sur l'URL depuis un navigateur, mais l'application présente plusieurs problèmes de configuration...
